

DATASHEET

Marker Lights are designed to create spots of accent lighting. A low energy liniLED strip is encapsulated in a cast polyurethane resin within epoxy coated 316 stainless steel with IP67 connectors, creating diffused spots of light suitable for streetscapes or drive over applications ~ 3,000lbs. The non-slip surface adds to their multiple purpose capability. Marker Lights come in a wide range of colors and are available in different sizes, including square and round shapes.
