

## DATASHEET

Our mounting channel is made of PET and has a self-adhesive backing that grips tightly for straight runs in minimum space. Apply to coves, surfaces or inside liniLED aluminum extrusions with diffusing lenses.

PET - polyethylene terephthalate, a plastic resin and a form of polyester.

PET is used in the automotive industry to make bumpers, grilles and door panels, luggage racks and fuse boxes, because of its strength, thermo-stability and transparency. It is lightweight, shatter-resistant and recyclable, and is used to make the anti-pilfer packaging you find in stationary and electronics stores and many food and non-food products.

Our PET mounting channels are super strong, recyclable and optically clear. They do not absorb water and are resistant to most chemicals and organic substances.

### MOUNTING CHANNEL

Note	Standard with double sided tape
Dimensions	L39"xW.71"xH.30"
Material	PET (transparent)
Length	3.25ft
Weight	1.8oz
