

DATASHEET

No stripping! No soldering! Just cut and push-fit the connector. Organic Lighting distinguishes itself by offering the most advanced and innovative product range of energy efficient, plug & play professional LED lighting strip products available.

Installer friendly, push on extension cord to connect two strips together. Simply cut and attach the connectors. Connectors lock onto the strip and require force to remove. They are directional and arrows on the connector should be matched with the arrows on liniLED.

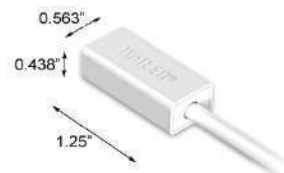

Without protection connectors are IP40.
For IP68 specify Submersible Connector Covers.

Extension cords offer directional changes, 90deg corners, breaks or return runs of liniLED.
