

No stripping! No soldering! Just cut and push-fit the connector. Organic Lighting distinguishes itself by offering the most advanced and innovative product range of energy efficient, plug & play professional LED lighting strip products available.

Installer friendly, push on connectors with either 3' or 16' cords connect power to liniLED without the need to strip the circuit board. Simply cut and attach the connectors. Connectors lock onto the strip and require force to remove. They are directional and arrows on the connector should be matched with the arrows on liniLED.

Without protection connectors are IP40.

For IP68 specify Submersible Connector Covers.

Connector sets are supplied complete with an endcap, and acid free silicone glue.

In addition we offer extension cords for directional changes, and in-line connectors for splicing - in case of error, and to minimize waste during field cutting and installation.

### Push-Fit Connector Sets

Dimensions	L1.25"xW0.56"xH0.44" Top L1.25"xW0.56"xH0.56" Side
Degree of protection (IP)	IP40, IP68 with Submersible Cover.
Material	Polycarbonate
Cord	White, PVC
Cord Length	3'3" and 16'3"
Weight	1.83oz 3'3" 7.76oz 16'3"
Packing	Per piece
<b>Product code</b>	<b>Description</b>
011200	liniLED® Mono, power connector set, 3ft, ea
