PCB Power White

The liniLED® PCB Power LED strip (IP20) is a high quality, flexible LED strip equipped with 3M double sided tape. Thanks to its small dimensions the PCB LED strip is ideal for usage in small (indoor) spaces.

In addition to the white colors 2400K-6500K, the liniLED® PCB Power LED strips are also available in Red, Green, Blue and Amber.

For the latest version of this datasheet, visit our website: www.organiclighting.com

Features

Made in USA/EU
Very flexible (bend radius > 0.79")
Ideal for small indoor spaces
Dimmable
Effective heat dissipation
Excellent lumen/Watt ratio
Binning ± 50K
Available in long lengths
Available in various colors
Extensive range of accessories
Plug & Play system

Available Colors

- liniLED® PCB 2400K Power
- liniLED® PCB 2700K Power
- liniLED® PCB 3000K Power
- liniLED® PCB 4000K Power
- liniLED® PCB 6500K Power

#### Bending Radius

Maximum bending radius is 0.79 in. Solely bend up or downward. Do not compress, stretch or bend the LED strip.
To calculate the power consumption of a single length of LED strip, use the equation below.

$$P_{\text{STRIP}} = W_{\text{WATTS}} \times L_{\text{LENGTH}} \times 110\%$$

- $P_{\text{STRIP}}$ Calculated power consumption of one LED strip in Watt
- $W_{\text{WATTS}}$ Typical power consumption in Watt per foot of the selected LED strip
  
  This value can be found under ‘Product characteristics’ on page 2
- $L_{\text{LENGTH}}$ Length of the connected LED strip in feet
- 110% Safety margin to buffer differences over all production batches
Cable Selection

The liniLED® LED strips need a minimum voltage at the beginning of the LED strip to function according to the specifications. The table below gives an indication of the maximum cable length based on the cable thickness and power supply voltage. The connection between the cable and LED strip is with a cable length of 3.28 ft.

In case the required length is larger than the length mentioned in this table, the supply voltage is different or if a detailed wire plan with branches is planned, please contact your distributor for a detailed cable calculation.

Symbols

UL is a world leader in product safety testing and certification. UL sets standards and tests products to make sure they meet standards.

The ETL Listed mark indicates that your product has been tested by Intertek and found in compliance with accepted UL standards.

Electro Static Discharge (ESD) sensitive device, apply standard ESD precautions when handling the product.

Manufacturer’s declaration that the product meets the applicable EC directives.

Suitable for mounting on all surfaces and suitable to cover with insulating material.

Restriction of Hazardous Substances (RoHS): product complies with the RoHS directive and each homogeneous material does not exceed the limits for the materials mentioned under the RoHS directive (Pb, Hg, Cr6+, PBB and PBDE).

Protected against ingress of solid foreign objects ≥ 0.49 inches. Not-protected against ingress of water.

Bending of the LED strip is possible with a radius of ≥ 0.79 inches in the specified direction.

Electrical appliance class III: this product is designed to be supplied from an extra-low voltage (≤ 60.0 V DC or ≤ 42.4 V AC).

System guarantee of 5 years when the complete system consist of liniled® products with the 5 year system warranty logo.
