- Possible to compose an IP40/IP67 Aeris luminaire
- Wide range of complementing (diffuse) accessories
- Ideal to combine with OrgaLED® LED strips
- Walkover profiles available on request

“Whether you are looking for an illuminated profile with a stunning diffuse light effect, a striking chandelier or a self composed IP40/IP67 luminaire: the sky is the limit!”

Covers | Creating the desired effect

The OrgaLED® Aeris range is complemented with various cover and mounting accessories. Depending on the required light effect, the profiles can be equipped with a clear (low) or diffuse (low/high) cover. The higher the profile and cover, the more diffuse the light effect will be.

Mounting | Easy & clean installation

Thanks to the light weight, durable aluminium materials, user friendly click system and various mounting options, the OrgaLED® Aeris Profiles are very easy to install. Realize a clean and 'invisible' finish with the OrgaLED® Aeris Clips or secure the profiles with the OrgaLED® Cable Channel, hiding all cables at the same time.

The OrgaLED® Aeris Profiles can also be installed in corners, while retaining a beautiful continuous light line. By using the OrgaLED® Aeris Linker 90, the profiles can be connected from the side.

The OrgaLED® Aeris Outer Corner allows the profiles to be secured around a corner, where the OrgaLED® Aeris Inner Corner realises the exact opposite. In addition, the profiles can also be rotated into several positions using the OrgaLED® Aeris Rotary Clip.

Besides the various mounting options for walls and ceilings, you can also create stunning chandeliers with the OrgaLED® Aeris Suspension Set.

Choose your color!

OrgaLED® Aeris is available in various colors (upon request)*

Create your own IP40/IP67 luminaire!

All OrgaLED® Aeris products can be mixed and matched into beautiful, pre-assembled 'plug & play' IP40 or IP67 luminaires. Simply choose the profile of your liking, select the desired light effect and lighting color. Finally, choose the preferred cable type, cable length and determine the position of the cable entry. Finish your luminaire with one of the several features and accessories.

Go to the Aeris configurator on our website and get started!
